

The Regional Municipality of York NOTICE OF COMMENCEMENT

UPPER YORK SEWAGE SOLUTIONS INDIVIDUAL ENVIRONMENTAL ASSESSMENT

The Regional Municipality of York (York Region) has initiated the Upper York Sewage Solutions (UYSSolutions) Individual Environmental Assessment (IEA). The purpose of the UYSSolutions IEA is to develop a sustainable sewage servicing solution for the upper York area, in accordance with the provincial initiative for growth outlined in the *Places to Grow Act* and with all applicable government legislation including the *Lake Simcoe Protection Act* and the *Great Lakes Charter*. The service area consists of the Towns and Communities of Aurora, Newmarket, Holland Landing, Queensville, and Sharon, as shown on the map below.

York Region is seeking input as part of developing the sewage servicing solution. The first step in the IEA process is to develop a Terms of Reference, which sets out the proposed framework for the preparation and review of the IEA.

Visit the project website at www.uyssolutions.ca to let us know what you think are the most important issues and opportunities for sewage servicing in your community (see highlighted area of map). By registering on the website you'll also receive invitations to future consultation events, such as Public Information Forums and Focus Group Sessions.

The first series of Public Information Forums for UYSSolutions is scheduled for June 2009. Watch for notices in your local newspaper and on the project website (www.uyssolutions.ca).

Want to get involved? Join the Community Liaison Forum ...

The project team is looking for residents, special interest groups, local businesses and community associations to join the UYSSolutions Community Liaison Forum. This Forum will play a key role in providing feedback about the UYSSolutions throughout the IEA process. Please contact us if you would like to be part of this group.

Visit the project website at www.uyssolutions.ca to find out more about getting involved.
